

## 3D PAPER CACTI

\* Green card, in different shades  
\* Glue stick \* Cacti templates \* Pencil  
\* Scissors \* White paint pen \* Pink tissue paper

- 1 Take three sheets of green card and fold each in half lengthways. Glue one half of each folded sheet to the next, to form a 3D card.
- 2 Lay the 3D card flat and put one of the cactus templates in the middle. Draw around the template and cut out.
- 3 Add some 'needles' to each side of the 3D cactus with the white pen.
- 4 Scrunch up some small pieces of pink tissue paper to make the little 'flowers', then glue them to the top of the cactus.
